

PUPPY

Summer POST 2024

Penny, school just ended – and you're already setting up the lemonade stand?

Sounds exciting! What do you have in mind?

Wow, that's a lot. Can we really afford all of that?

Going places is cool, but you know the best part of summer is just spending time together and playing.

Oh, you know – we can stash it in our **DFCU Financial** savings account for another day!

Absolutely, Bill! I've got big plans for the summer, and we need some cash to make them happen!

I want to go to the water park, theme park, arcade, bowling alley, mall, that awesome boba tea place ...

Sure, if we start our lemonade sales now, I'm sure we can save up enough.

Let's invite Buck, too! He'll love it. But what about all the money we'll make from the stand?

Penny's Lemonade

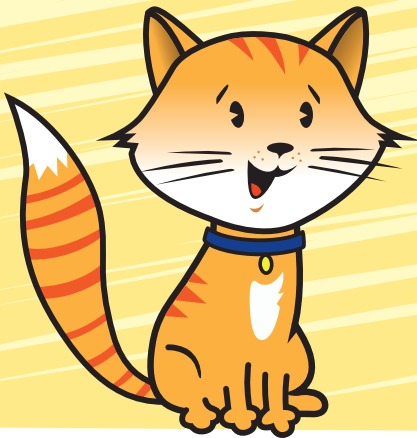

Hey there, buddies! Bill and Penny are excited to start earning and saving money this summer together. Turn the page to help them count what they've earned. Also, guess what? We've got an awesome summer bingo game waiting for you with lots of fun and affordable activities.

Count Those Coins!

Penny and Bill have been super busy at their lemonade stand, serving lots of thirsty customers. Each customer ordered something different and paid different amounts of money. Penny and Bill need your help to count how much money each customer gave them. Can you be their counting buddy? Just write down the total amount of money for each customer in the blank space.

Quarter = 25¢ • Dime = 10¢ • Nickel = 5¢ • Penny = 1¢

1 _____ ¢

2 _____ ¢

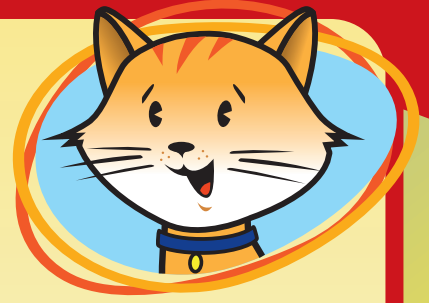

3 _____ ¢

4 _____ ¢

Colorful Counting

Buck wants to help count coins, too! He sometimes mixes them up because they look so similar. Let's make it easier for him by coloring the coins. Here's what we're going to do:

Color Pennies
Red

Color Nickels
Blue

Color Dimes
Green

Color Quarters
Purple

Now, let's count them up!

Pennies: After you color them red, count them. How many red pennies are there?

Nickels: Once they're blue, count those, too. How many blue nickels did you find?

Dimes: Let's see those green dimes! Count them up – how many does Buck have?

Quarters: Last but not least, the purple quarters. Count them up – how many are there?

Puppy Trainers

A Guide for Teaching Kids About Money Memories

Ah, summer! It's that time of year again when the kids are home, full of energy, and looking for adventure. But the best and most memorable adventures don't always have to come with a big

price tag. That's why we're switching things up in our Puppy Trainers corner. Instead of the usual tips, we've got something way cooler for you budget-savvy, fun-loving parents: Summer Fun Bingo!
